

In one year the Government Relations/ Utilities committee has had a speaker from the water department show up and give a presentation at the Government Relations/ Utilities meeting. And another speaker from SBC has come to our main meeting the Community Council and present about the power lines. This time last year, The Government Relations/Utilities committee where into utilizing more governmental officials to come and present at the Community Council meeting. We did such an outstanding job that now a year later we are asking certain officials to come every other month so that we can end the meeting before 10:00PM. With the departure of one of the founding members of the Government Relations/Utilities committee Ralph Stewart, because of medical reason, we shall not forget the fact that he was a major influence of getting governmental officials to participate at our meeting. And who can forget The God Bless America Week recognition award that Ralph received in writing from the Governor Schwarzenegger.

In conclusion the Government Relations/Utilities committee has become more influential and better each year since it has been restarted.

Anthony R, Mitchell
